DETAILS OF ANY ALTERNATIVE OPTIONS

1. The primary objective for the North Street MPR corridor is to address the particular road safety problems that have resulted in casualties to people and therefore casualty data have been taken into account in designing appropriate engineering measures. Where possible to do so, options were designed for consideration through the consultation at the three key locations described earlier in the report, taking into account any previous consideration of those locations by officers e.g. the Clock Tower junction.
2. A summary of the options consulted on for particular locations along the MPR corridor, and the responses received are set out in Appendix A.
